Experience

Constructing a real-time chat website that offers a wide range of features to connect with friends, including profile editing, creating group chats, sending and receiving messages, sending and receiving images, uploading images, and providing a chatbot for support services.

Formulating an Ai-services website for starting conversation with Ai Training model crafting your on music and videos and images

Establishing a weather website with seamless Google account integration for logging in and logging out. The site will display weather information based on the city selected in the search input. Weather details will include "feels like" temperature, wind speed, pressure, and humidity. Lastly, providing the weather forecast for the next 7 days, starting from the current day.

Building a feature-rich movie website that enables users to search for and watch their favorite movie trailers. The site will display detailed information for each selected movie, feature custom buttons for starting and ending videos, and change the background based on the selected movie. Additionally, it will have a responsive design to fit a wide range of devices.

Developing a Game Hub project utilizing ReactQuery for fetching data and caching and implementing infinite scrolling , showcasing genre browsing, game filtering by platform, and detailed game pages. Leveraging React.js, Next.js, Tailwind CSS, and Framer , and much more to come

SUMMARY

- Specialized in front-end framework construction using React and Next.js.
- Designed layout and graphics to enhance aesthetics and appearance of the website.
- Troubleshot website on different browsers to determine quality.

SKILLS

Next.js
React.js
Tailwind Css
Typescript

certifications

- The Ultimate HTML5 & CSS3 Series certified.
- Ultimate JavaScript Part 1&2: Advanced Topics certified.
- React 18 for Beginners certified.
- React: Intermediate Topics certified.
- The Ultimate TypeScript Course certified.
- Mastering Next.js 13 with TypeScript certified.
- The Ultimate Git Course certified.
- DataStructure and Algorithms certified

- Developed and integrated payment processing features onto Ai websites.
- Designed and implemented website interface for mobile, desktop and tablets.
- Contributed to back-end experience and collaborated on APIs.
- Coordinated usability testing and corrective action of bugs.

LANGUAGES

Arabic - English

EDUCATION

Damanhur University, Damanhour— *Bachelor of Information Technology*

GRADUATION PROJECT - Chat web application

In my role for the graduation project

- contributing to the development of a comprehensive chat-AI-web application.

-The application facilitated seamless user interactions through individual and group chats, ensuring a remarkable user experience.

-Leveraging technologies such as Pusher and Next.js, we integrated AI services that enabled users to generate images and engage in real-like conversations with AI, including video and music generation functionalities.

-To enhance user immersion, we incorporated sound outputs for the AI interactions.

-offering our users an upgrade plan through a supported gateway powered by Stripe, providing them with extended functionalities and benefits.

Technology

Stripe - OpenAi - Replicate- Firebase - Strapi - ReactQuery

-ReactRouter -Auth.js -RESTful - Api - Prisma - MongoDB

-MySQL - Tiptap - wordpress - MaterialUi - TailwindCss - Shandcn/ui

-Bootstrap - Framer
